github.io It is built to be fast and efficient. It works by building a concept graph and then tries to extract the concept graph from the file. It works on a naive approach which doesn't utilize any heuristics. If you want to guess the number of files, see here.

Why use GuessIt? If you have a movie collection and you want to: See what all the movies are. Find out what the name of the movie is. What is its director? Who made it? What year it was made? What genre it is? What country it was made in? ...etc.

GuessIt is the only tool that can find these information in a file name. The goal of the project is to help people find all the information they need in a file and make it easier to find it out. What is GuessIt? GuessIt is a project that is built to extract a concept graph of a file. Example: We have a video folder with the following files: test.mp4 ttest.mp4 timit.mp4 video.mp4 vovideo.mp4 The idea is that the python program will be able to extract this concept graph: If you want to learn more, read the blog post. Usage: \$ python guessit.py \$ python guessit.py aaa If you want to learn more about guessing the number of files, see here. Table of Contents Usage The output would be: {u'movie_count': 2, u'director_name': u'tttest', u'genre': u'', u'year': u'2011', u'studio_name': u'Beatsound', u'max_shot_length': u'00:08:30', u'overview_length': u'00:00:10', u'stills': [{u'start_frame': 0, u'end_frame': 21}, {u'start_frame': 22, u'end_frame': 51}, {u'start_frame': 52, u'end_frame': 100}], u'max_shot_location': [{82157476af
